(57) **ABSTRACT**

A high security anti-splash cuffing box system is provided for enabling articles to pass through the access opening of a high security door or wall and for the safe hand cuffing of prisoners or detainees by personnel outside the cell. The system embodies a door frame assembly providing a sliding door movable between a locked engagement and an unlocked disengagement in a closed and an open condition relative to the access opening, while providing anti-slam functionality. A cuffing box providing an enclosure with 280-degree visibility is detachably connectable and securely engageable to the door frame assembly.
